

RobotCub

- Robot planned for spring 2007
- More copies will be built
- More software will be developed
- Willing to contribute:
 - Sure! At any time, by any means
 - Liked Yarp? We'd be more than happy if you continue to use it and provide feedback

Willing to participate

- Visiting our lab: needs some arrangement but it can be done
- Robots will be available in Genoa for people to come and develop small projects (or larger ones)
- Contributing with software: at any time of course
- Participating to our meetings: they are open! Please let us know if you like to be in our mailing list of "interested people" (very low traffic)
- Become a partner: a part of the RobotCub budget is allocated to an open-call to include more partners: the prize, a full-fledged RobotCub platform (for institutions and laboratories only)
- Interested in a PhD or post-doc? Let us know!

Long life RobotCub!
