

# David Vernon

euCognition

[www.euCognition.org](http://www.euCognition.org)

Professor of Computer Engineering  
Etisalat University College  
Visiting researcher, University of Genoa  
Network Coordinator, euCognition

Main activities:     The RobotCub cognitive architecture  
                          Coordination of European Network for the Advancement of  
                          Artificial Cognitive Systems ... open for membership!

Interests             Cognitive systems (particularly enactive approaches)  
                          Computer vision (particularly Fourier techniques,  
                          cf. motion segmentation, figure-ground segmentation,  
                          vergence)
